The Solar World Congress 2019 is being organized jointly by the International Solar Energy Society (ISES), the Solar Energy Research Center of Chile (SERC Chile) and the IEA Solar Heating and Cooling Programme’s (IEA SHC). The SWC 2019 is also supported by the Chilean Energy Ministry, the CORFO Solar Committee, the University of Chile and other national and international institutions.

For the venue, it has been selected Centro Parque in Santiago, Chile. Here we are providing a unique opportunity for your institution, organization or business to meet a global audience from the solar and renewable energy community.

The Solar Fair will have 2,300 m² (in and outdoor) to show and interchange your experiences, innovations, and projections as part of the world’s renewable community.

The Solar Fair will gather exhibitors: from the industry, utilities, suppliers, and users of renewable energy. We will also have exhibits from the Government sector as well as to local experiences that use renewable energy, as well as educational experiences and outstanding cases. Always following the ISES main idea: put together the industry, professionals, academic and authorities under a singular space.

**Why participate in the SWC2019 Fair?**

- **Positioning** – Be seen as a leader within the solar and renewable energy community.

- **Branding** – Raise your company’s visibility, increase your brand awareness and highlight your company’s presence as an active and important player in the field.

- **Focus** – Interact with an international audience. Generate new business for your products and services.

- **Network** – Our Solar Fair is located in the heart of the SWC2019 giving you the opportunity to network with colleagues, potential customers and leaders in solar energy research and development. You will have the opportunity to interact with an ample audience. Both the attendants of the SWC 2019 as well as invited public and interested professionals.
